# UIPM CONTINUES ESPORTS EVOLUTION WITH LAUNCH OF NEW OBSTACLE LASER RUN MOBILE GAME

- Thrilling upgrade to classic E Laser Run features exciting new obstacles
- Launch marks new chapter in UIPM’s electronic sports journey
- Available to download now on App Store and Google Play

The Union Internationale de Pentathlon Moderne (UIPM) proudly announces the launch of its latest digital innovation: the NEW Obstacle Laser Run mobile game.

As an evolution from UIPM’s previous E Laser Run releases, which focused on running and laser shooting, this latest version introduces a whole new level of excitement with dynamic obstacles, creating a comprehensive and challenging experience right at players’ fingertips.

Building on the transformation of the Olympic sport of Modern Pentathlon, which now comprises Obstacle alongside Laser Run, Fencing and Swimming, the inclusion of obstacles in the updated mobile game tests players’ agility, endurance and precision.

Designed for athletes and gaming enthusiasts alike, the Obstacle Laser Run mobile game offers an immersive experience where players can push their skills further by navigating through challenging terrains while maintaining laser accuracy.

“We all know the importance of having a powerful electronic sports offering alongside our physical sport, and UIPM’s new Obstacle Laser Run game marks a significant leap forward for our digital portfolio," said UIPM President Dr Klaus Schormann.

“On behalf of the UIPM Executive Board I am proud to present this first instalment of Obstacle Laser Run, marking an evolution from our previous games and setting the stage for even more exciting developments. This launch represents our commitment to innovation and connecting new audiences with the sport.”

Key features of the new Obstacle Laser Run game include:

- Elevating the original E Laser Run format with challenging obstacles that demand agility, timing, and precision.
- Available for download on App Store / Google Play store, bringing high-stakes action directly to players’ mobile devices.
- Leaderboards and scoring encourage players to continually improve their performance, compete with friends, and join a global community of players.
- This release is only the beginning; UIPM has committed to further enhancing the Obstacle Laser Run game in future versions, bringing even more interactive features and advancements to the mobile experience.

With the release of the Obstacle Laser Run mobile game, UIPM continues to lead in engaging digital content, blending physical sports with accessible, innovative platforms. Obstacle Laser Run is available for download now, inviting players worldwide to experience the thrill and skill required for modern pentathlon in a brand-new format.

Download the Obstacle Laser Run mobile game today from the App Store / Google Play store and experience the action for yourself!
